**CONA®B-Universal Fig. 604 with
CONA®-Connector Fig. 681....2**
Features CONA®-Universal ANSI:

- For the discharge of
 - Fig. 604 / 622 / 642 / 643: cold condensate
 - Fig. 628: hot condensate
- Robust and resistant to water-hammer
- Automatic air-venting during start up and operation of the plant
- Fig. 604 / 622 / 642 / 643:
Integrated non return protection
- Mounting position:
 - Fig. 604 / 622: any, except cap upside down
 - Fig. 628: plug always upside down
 - Fig. 642: any position
 - Fig. 643: always with drain plug upside down
- Construction in high quality stainless steel
- Optimized design for quick installation
- Can be combined with all types of CONA-Connector

Features CONA®-Connector ANSI:

- Space saving, compact design
- Minimization of installation and maintenance labor
- Material optional in forged steel and stainless steel
- Fig. 682: with outside strainer
- Fig. 683 / 684: with integrated, low-maintenance stop valve with gland seal (on request with maintenance free bellows seal design acc. to german clean air act "TA-Luft")
- Simple replacement of steam traps by shut-off of inlet and outlet
- Optional with blow down valve
- Fig. 683: Recommended in combination with CODcollector
- Elimination of potential leak points by reduced numbers of pipe joints
- Can be combined with all types of CONA-Universal
- Pressure test acc. to API 598

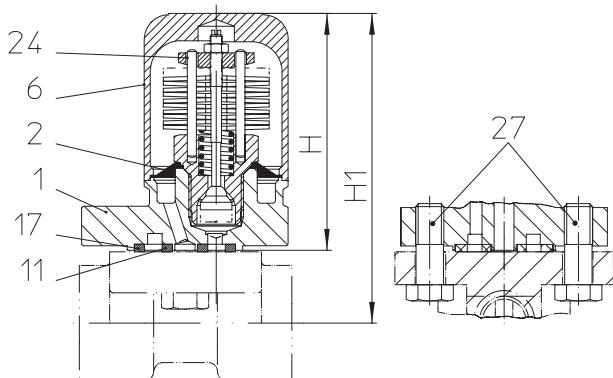

CONA®B-Universal - Bimetallic steam trap (Stainless steel)

Fig. 604 Universal flange with 2 x 3/8" UNC-thread

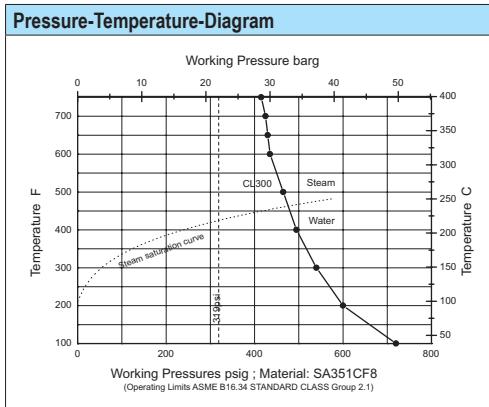

Figure	Nominal pressure	Material	NPS	Operating pressure PS	Inlet temperature TS	max. differential pressure ΔPMX	for controller
55.604	ANSI300	SA351CF8	2 x 3/8"	22 barg	400 °C	22 bar	R22

Types of connection

- Universal flange 2 x 3/8" UNC-thread

Features

- Bimetallic steam trap with corrosion resistant and water hammer proofed bimetallic controller
- Automatic air-venting during start up and operation of the plant
- Non return protection
- With inside strainer
- Robust and insensitive to waterhammer
- Installation in any position, except cap upside down
- Optimized design for quick installation
- Can be combined with all types of CONA-Connector (refer to page 6)

Types of connection	Universal flange
NPS	2 x 3/8"

55.622	ANSI300	SA351CF8	2 x 3/8"	29 barg	400 °C	29 bar	R32

Types of connection

- Universal flange 2 x 3/8" UNC-thread

Features

- Thermostatic steam trap with noncorrosive and robust water hammer proofed capsule
- Non return protection
- With inside strainer
- Robust and insensitive to waterhammer
- With capsule for condensate sub-cooling about approx. 10K
- Installation in any position, except cap upside down (Filter effect maximised at horizontal installation)
- Optimized design for quick installation
- Can be combined with all types of CONA-Connector (refer to page 6)

CONA®S-Universal - Ball float steam trap (Stainless steel)

Pressure-Temperature-Diagram

Fig. 628 Universal flange with 2 x 3/8" UNC-thread

Figure	Nominal pressure	Material	NPS	Operating pressure PS	Inlet temperature TS	max. differential pressure ΔPMX	for controller
55.628	ANSI300	Body: SA182F321 / Hood: SA240Gr.304	2 x 3/8"	29 barg	400 °C	29 bar	R32

Types of connection

- Universal flange 2 x 3/8" UNC-thread

Features

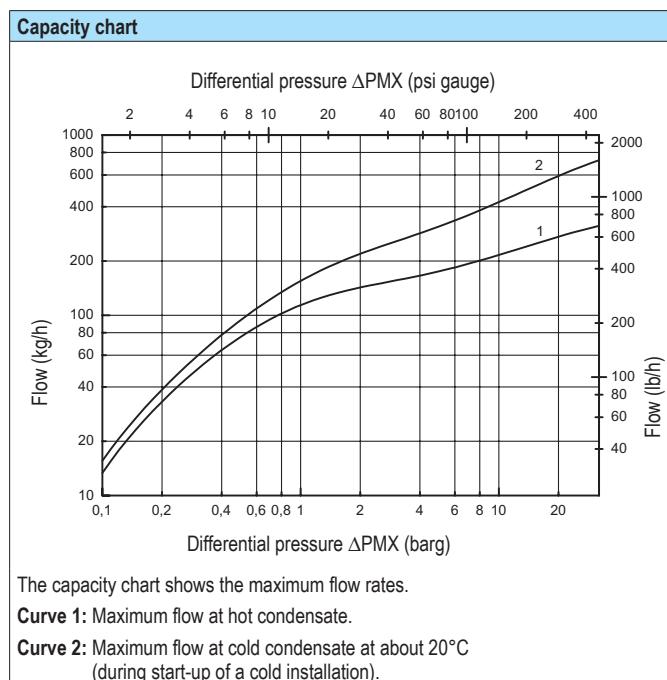

- Ball float steam trap with level control for the condensate-discharge from all kinds of steam systems
- Rapid system start-up due to thermostatic air venting capsule
- Immediate discharge of hot boiling condensat
- Robust and insensitive to waterhammer
- Installation always with drain plug (Pos. 50) upside down
- Can be combined with all types of CONA-Connector (refer to page 6)

Types of connection		Universal flange
